

PROTEUS 8 SP0 INSTALLATION MANUAL

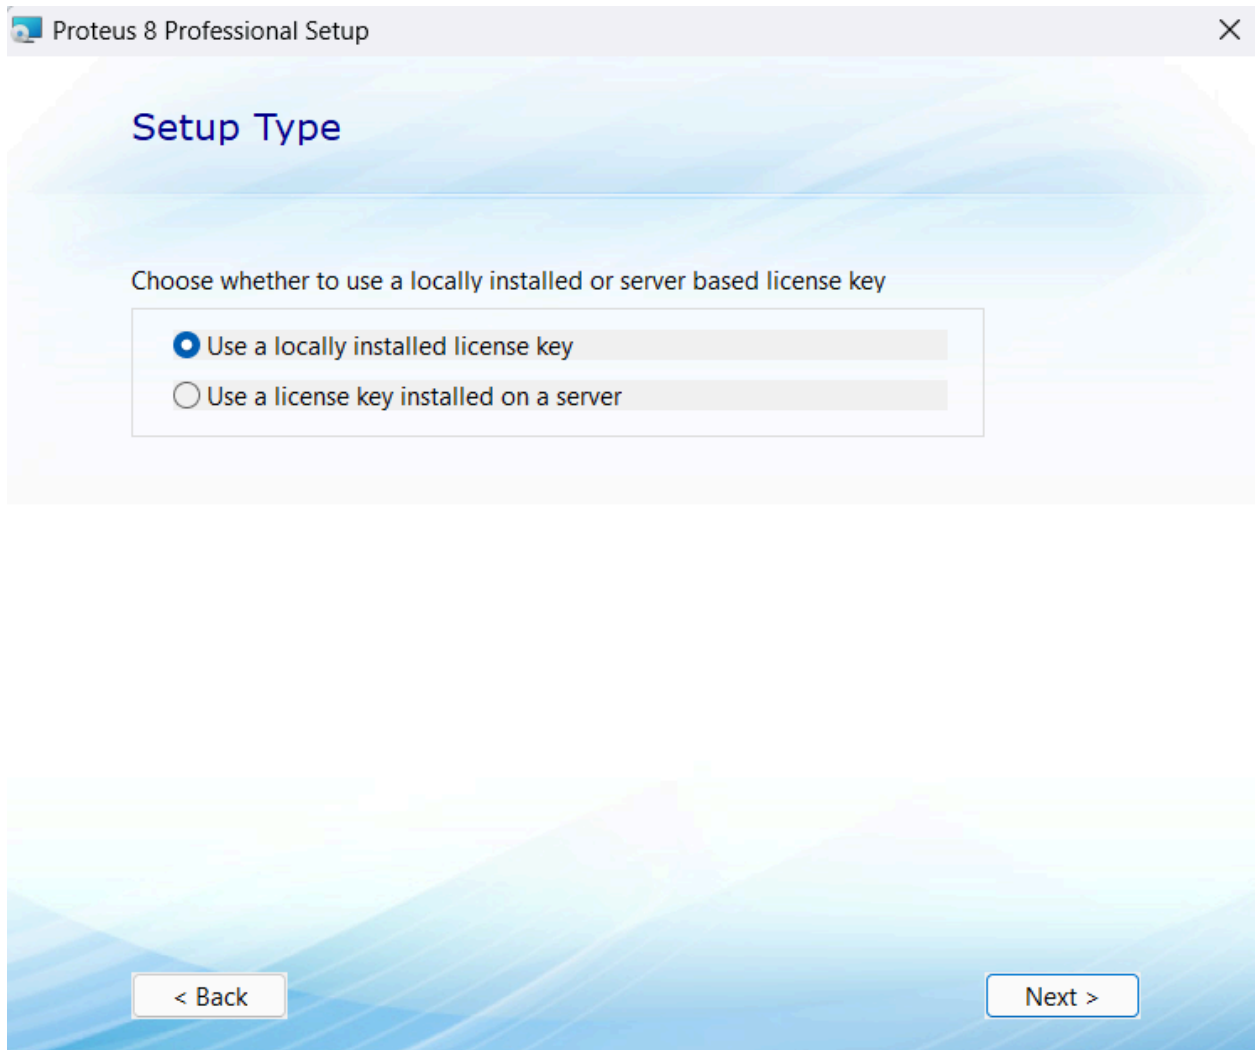

1. Run the installation file 'Setup.exe'.
2. Click 'Next'

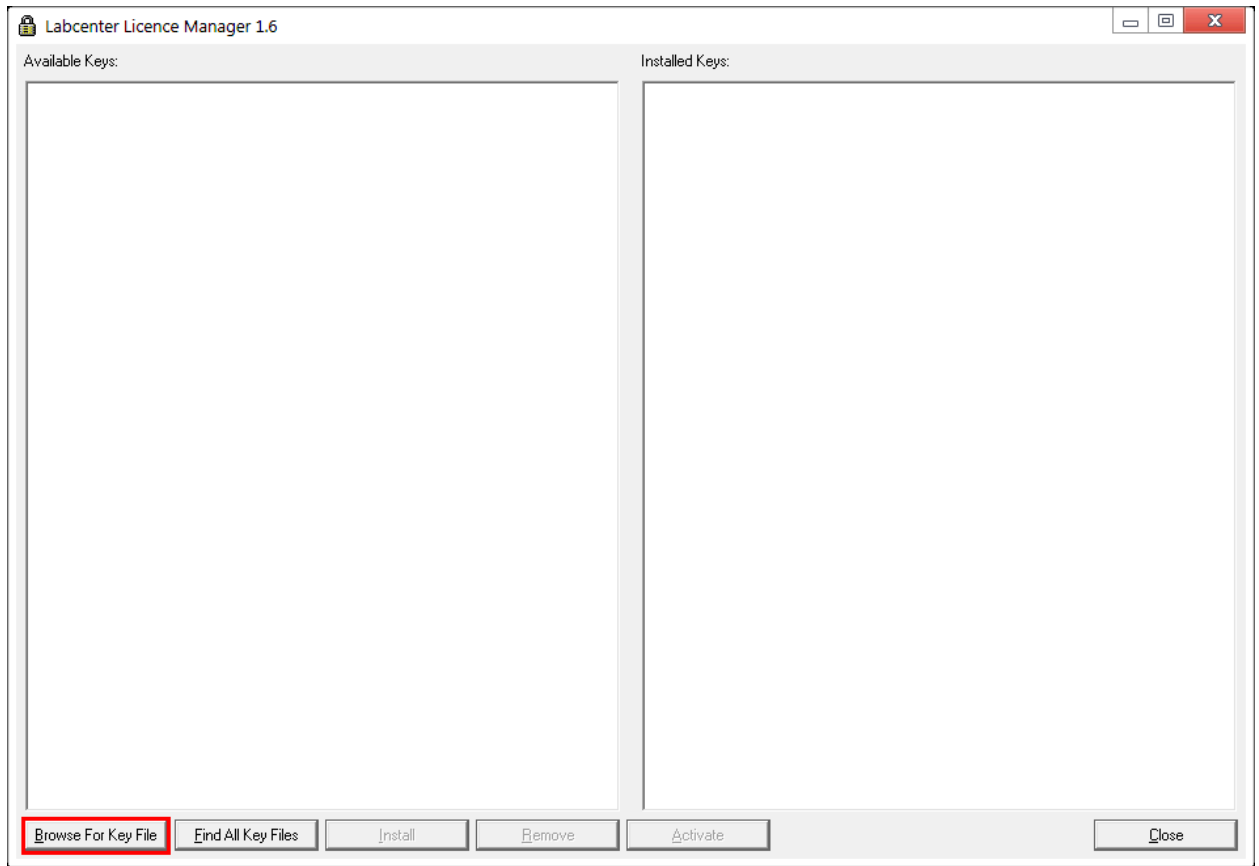

3. Accept the Licence Agreement and proceed by clicking 'Next'

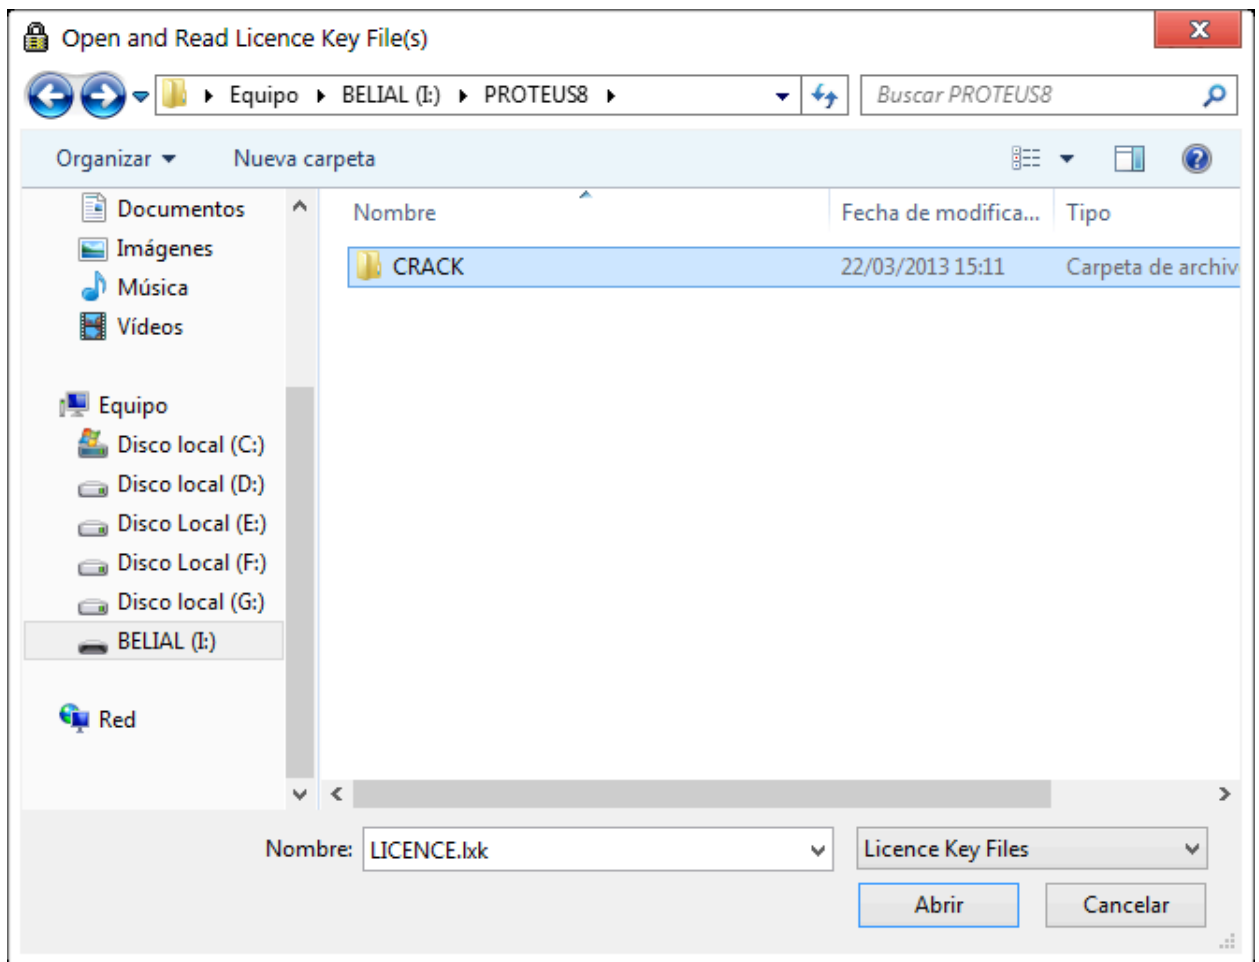

4. Choose 'Use a locally installed license key' and click 'Next'.

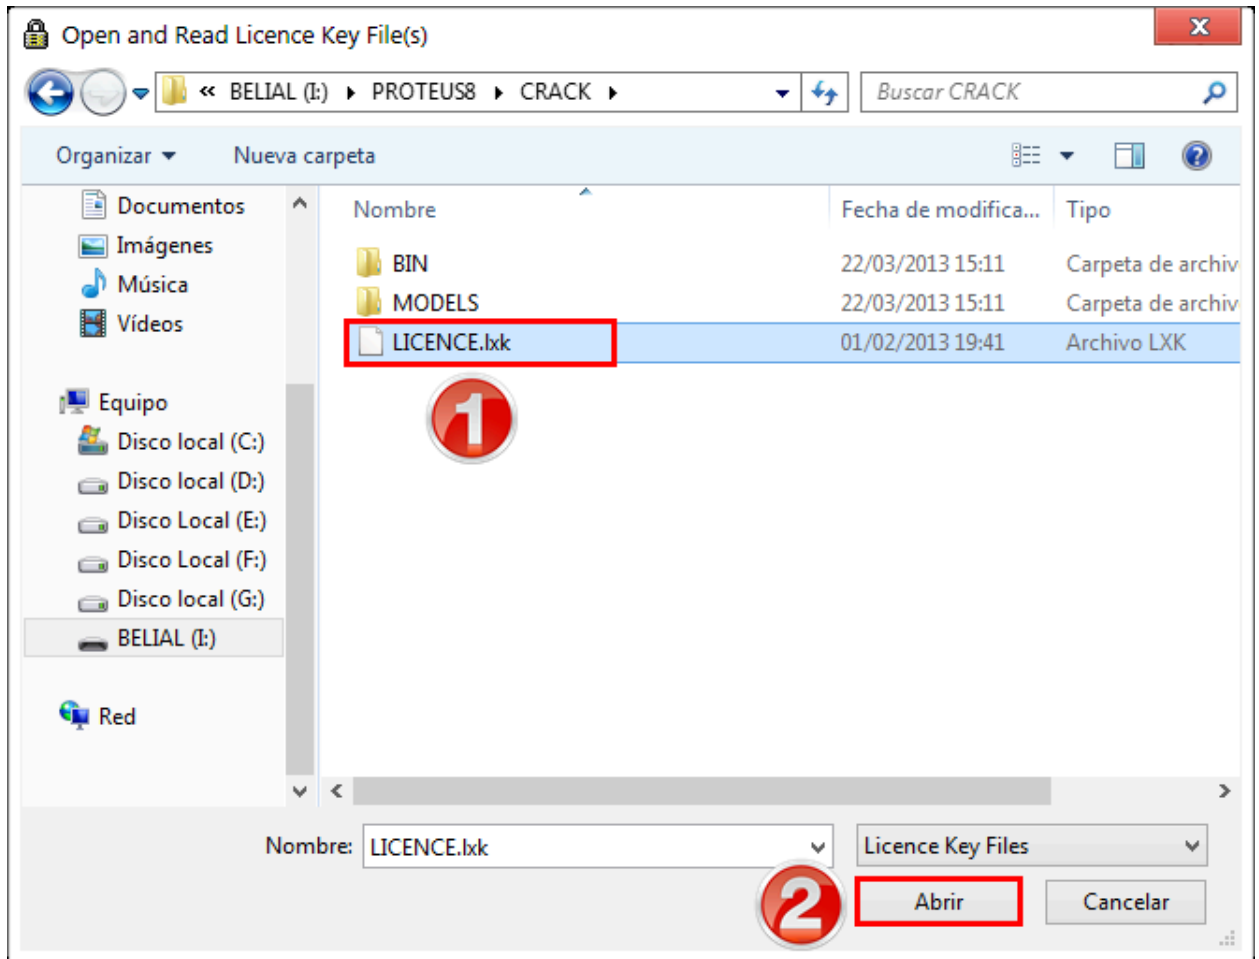

5. Continue clicking on 'Next'.
6. Click on 'Browse For Key File'.

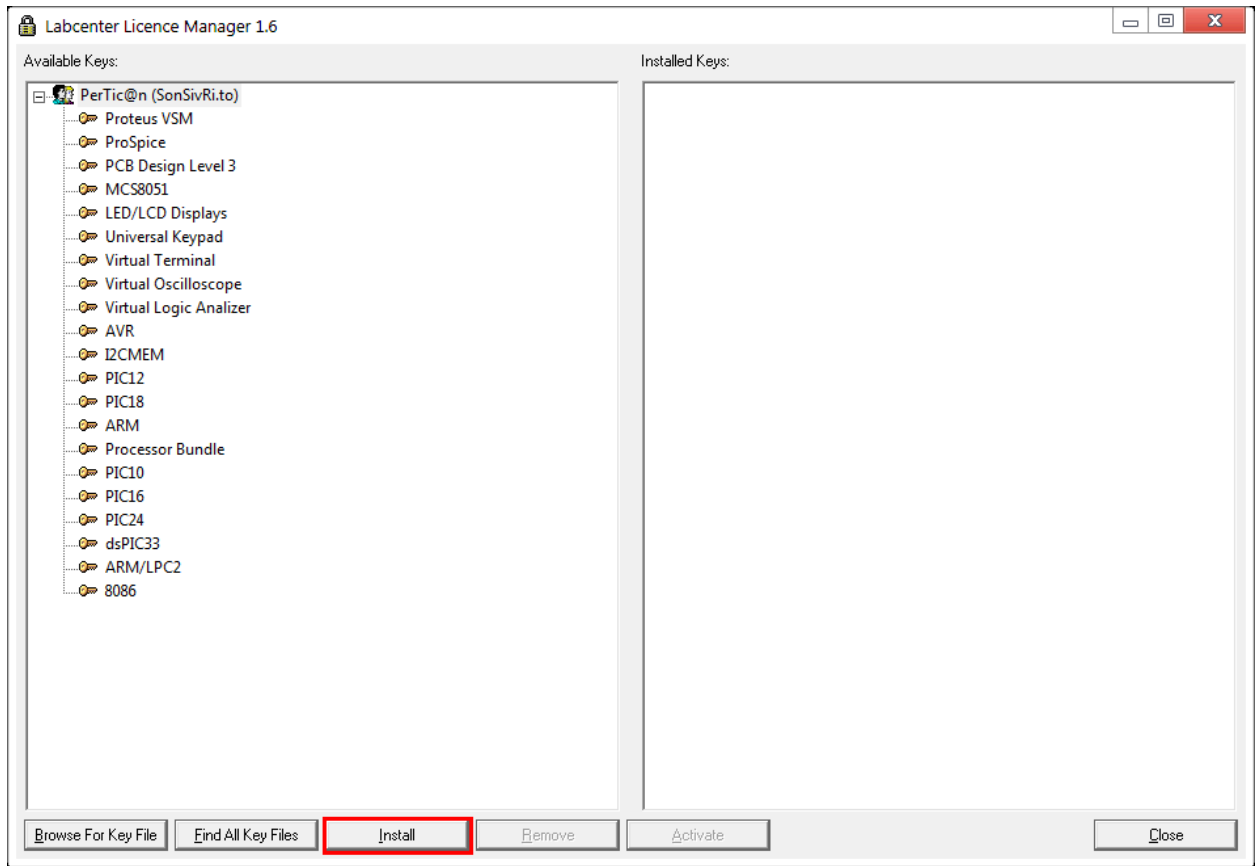

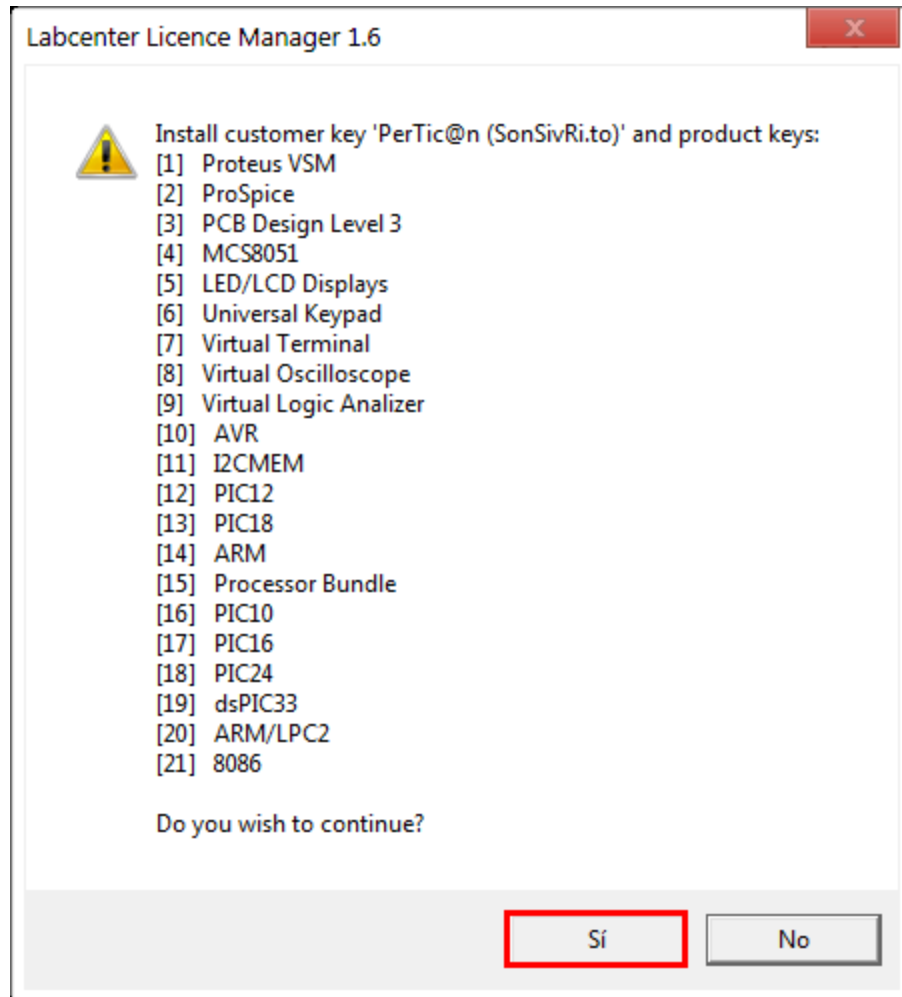

7. Open your 'CRACK' file and open the 'LICENCE.lxk' file from there.

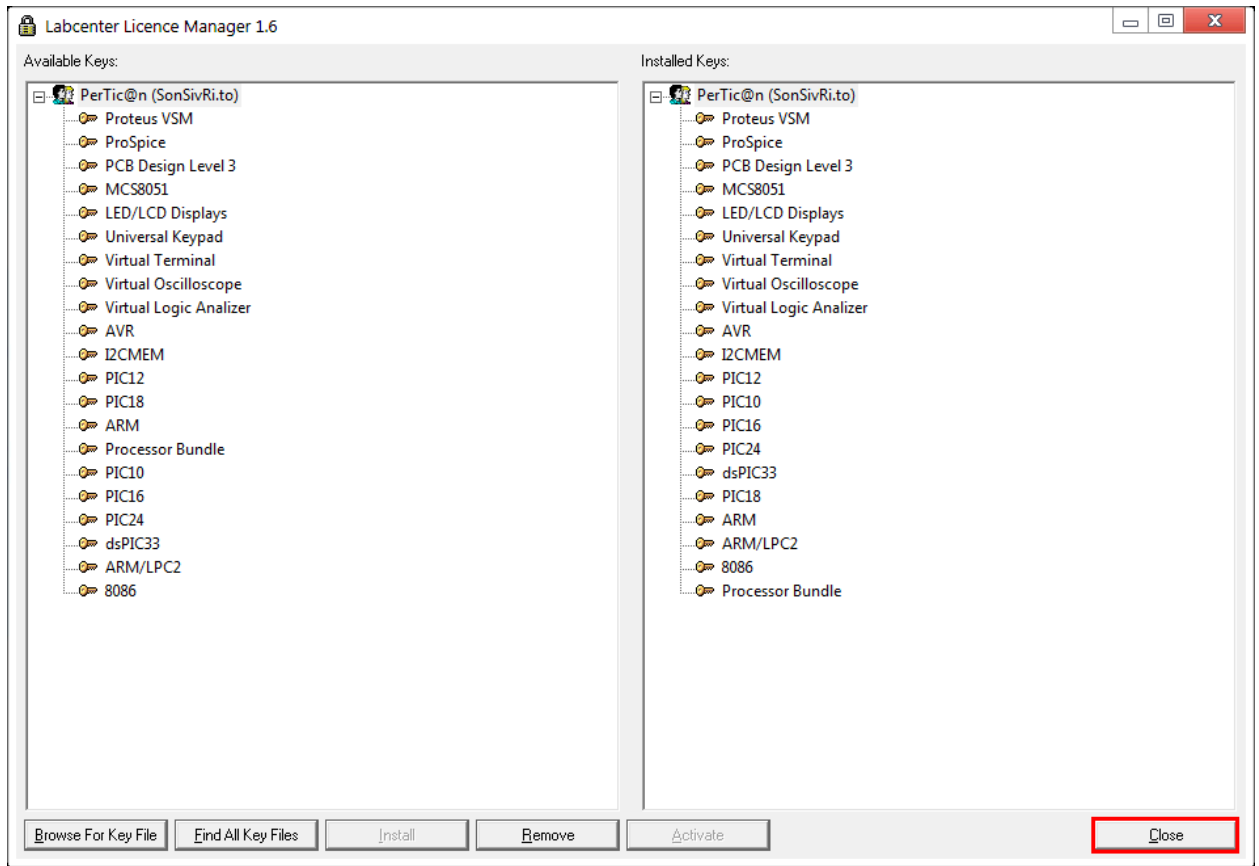

8. Click 'Install' and 'Yes'.

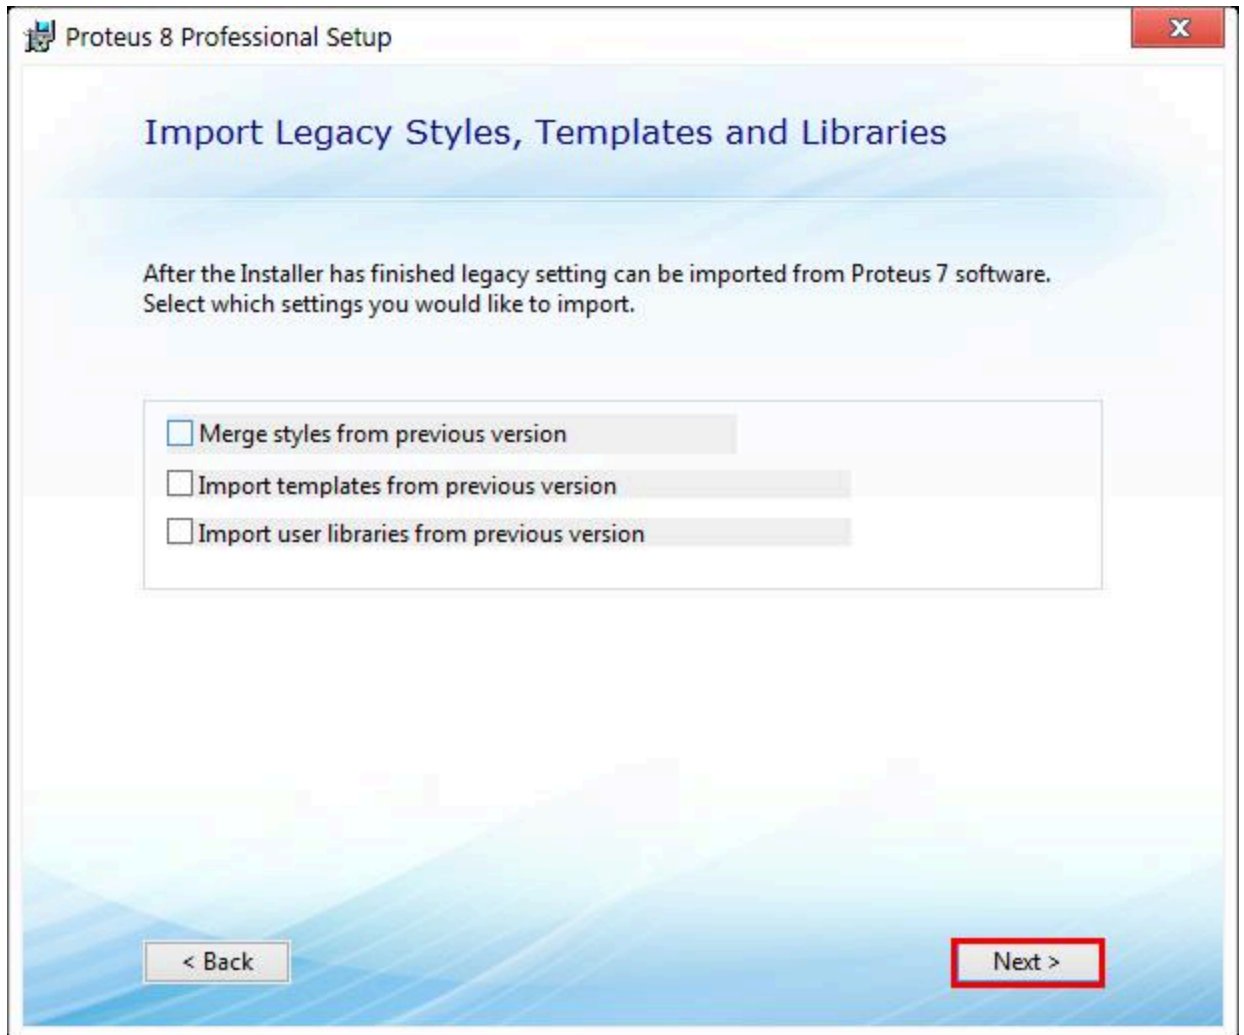

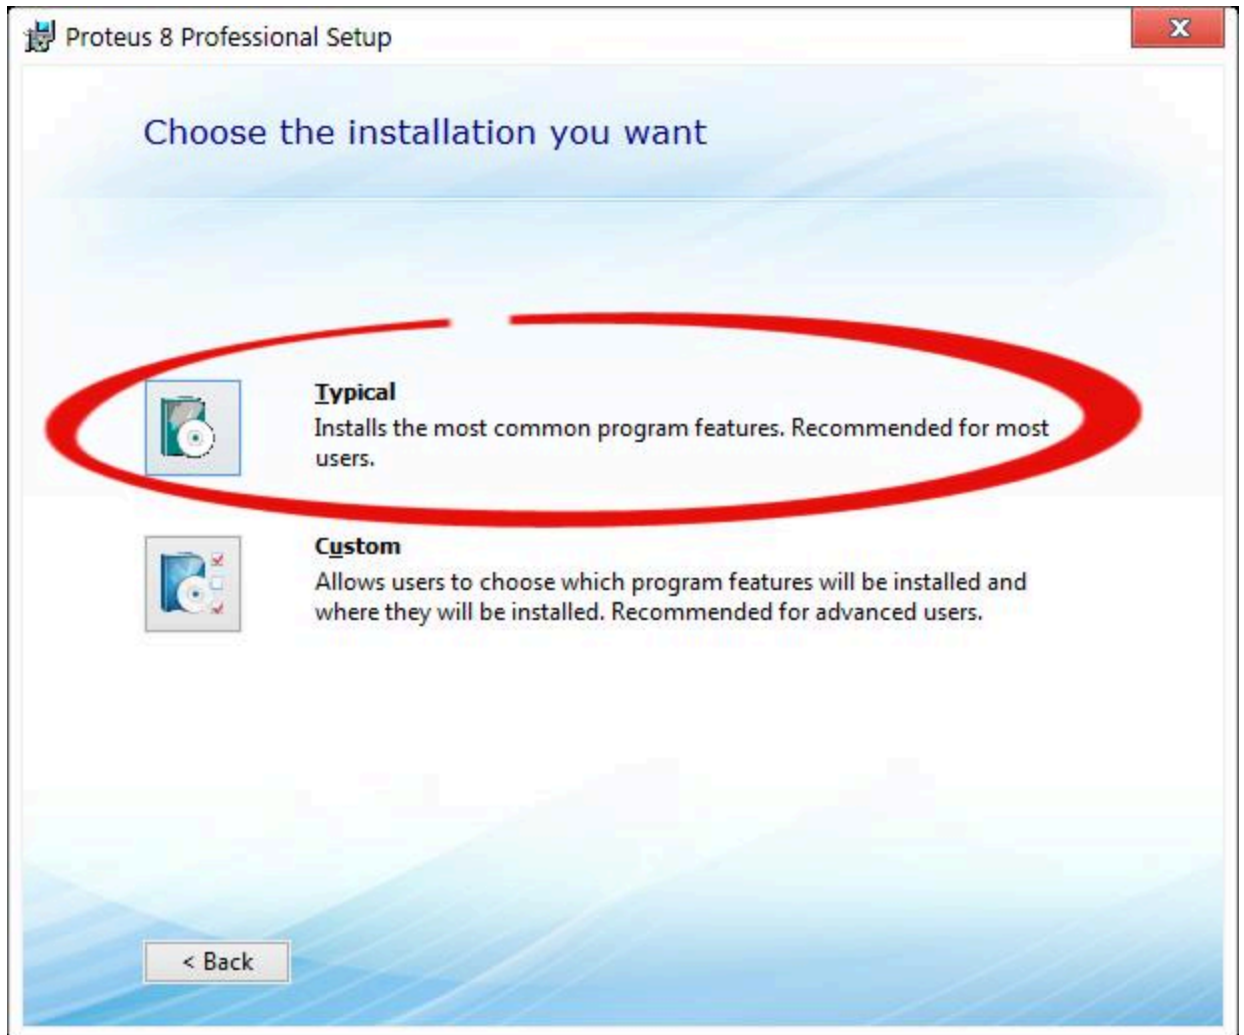

9. Then 'Close' it.

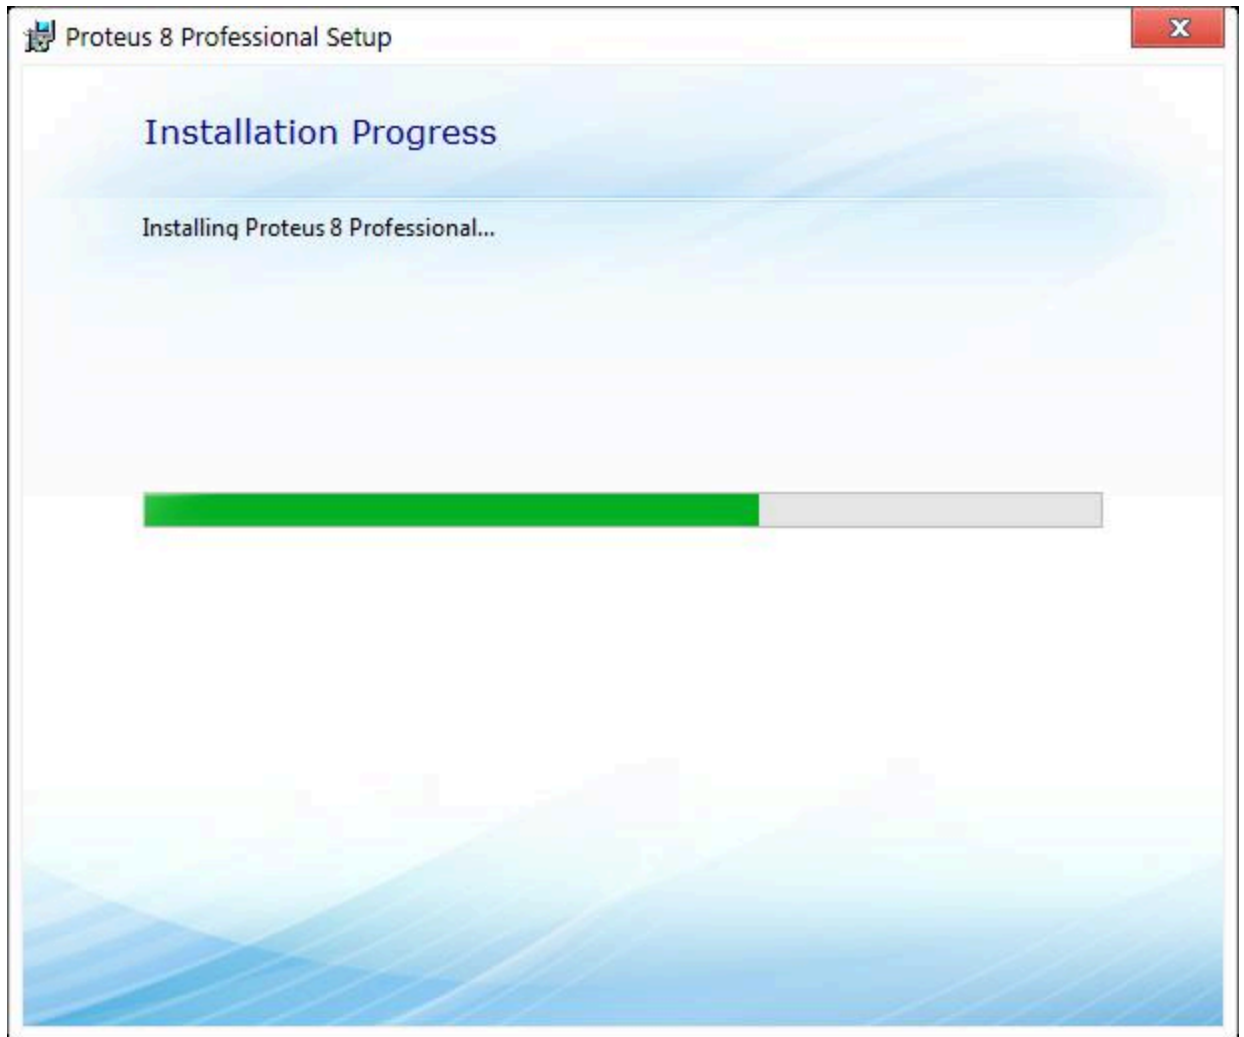

10. Click on 'Next'.

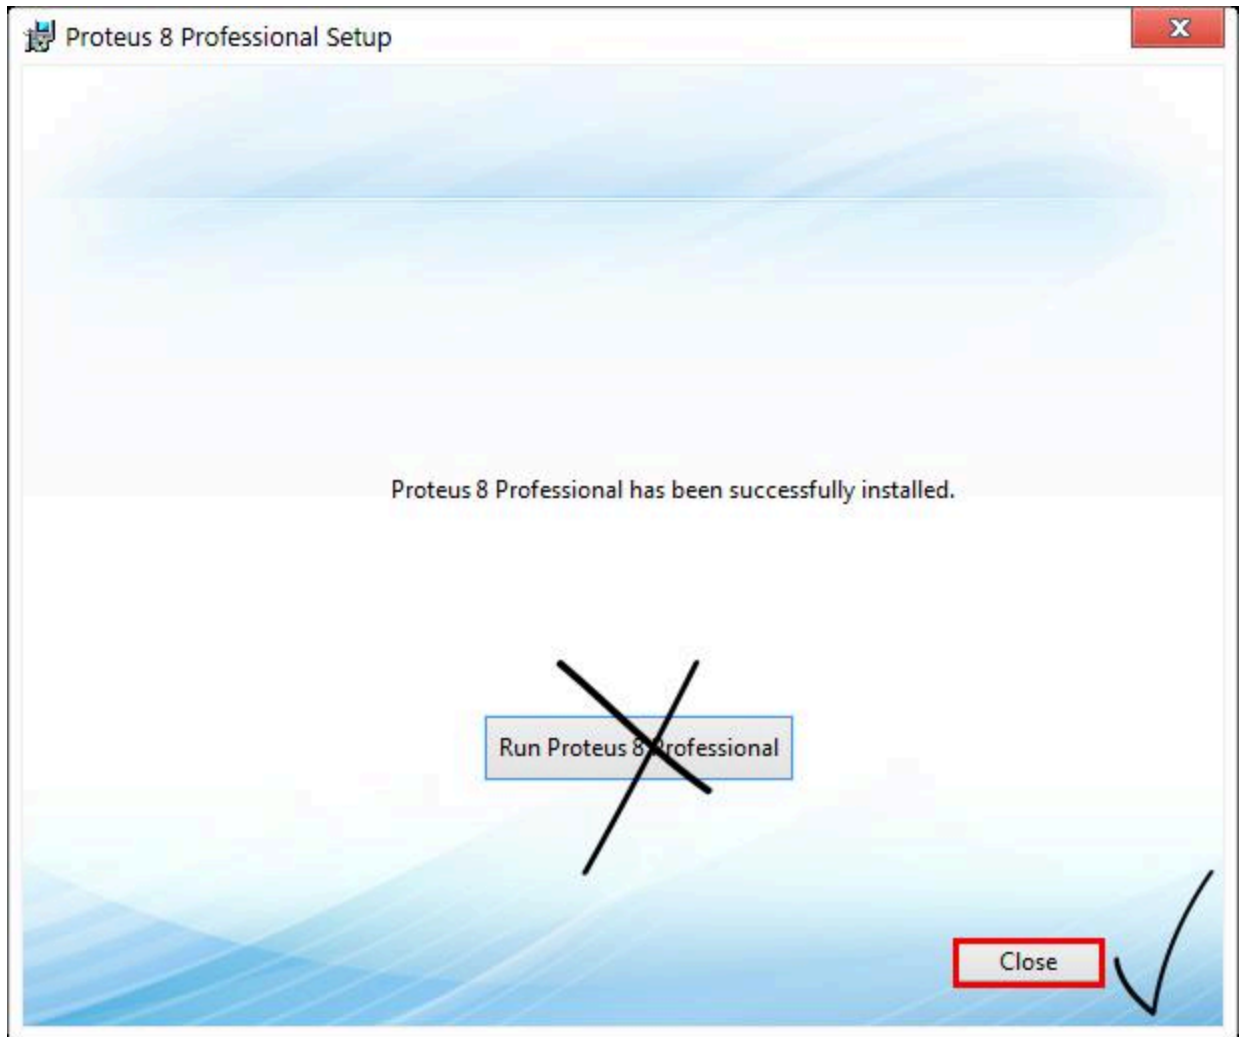

11. Choose 'Typical'

12. Wait for the installation to complete.

13. After Installation 'Close' it.

14. Before using Proteus, inside the 'CRACK' folder, copy the 'BIN' folder and paste (replace the existing BIN folder) it into the Proteus installation directory. The installation path is usually one of the following:
- C:\Program Files\Labcenter Electronics\Proteus 8 Professional
 - C:\Program Files (x86)\Labcenter Electronics\Proteus 8 Professional

You might need to give administrator permissions to replace some files.

15. Now we go back to the 'CRACK' folder, copy the 'MODELS' folder.
16. Go to
C:\
Choose 'View' > 'Show' > 'Hidden Items' from top bar
Enable showing Hidden Items in your C drive. You will see
'ProgramData' appearing after that.
17. Now paste the 'MODELS' folder into the following path
depending on your version of Windows.
 - 'C:\ProgramData\Labcenter Electronics\Proteus 8
Professional'
18. And You are now ready to start.
