

Describing Graphs & Charts

Structure for Writing

Introduction

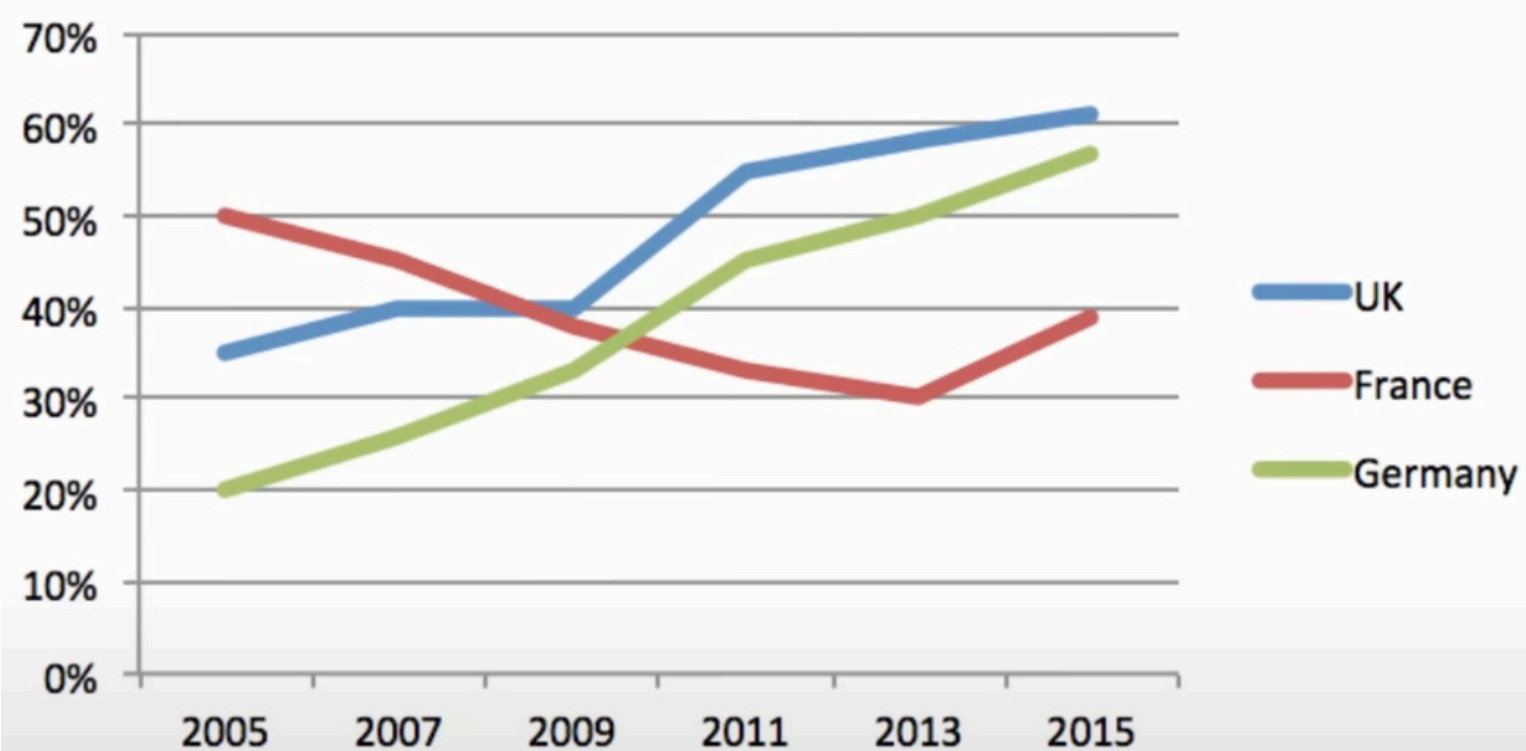

Overview

Feature 1

Feature 2

Conclusion

Regional household recycling rates

The line graph below shows the household recycling rates in three different countries between 2005 and 2015.

Introduction

- **Simply Paraphrase information from topic**
- **Don't change type of figure name**
- **List countries name present**
- **Mention Time period**

What figure shows

What countries

What time period

Overview

- **Key information from the graph**
- **No date/number/percentage**
- **2-4 key features**
- **significant rise/upward/downward trend**

**Encouraged to begin with
“Overall”**

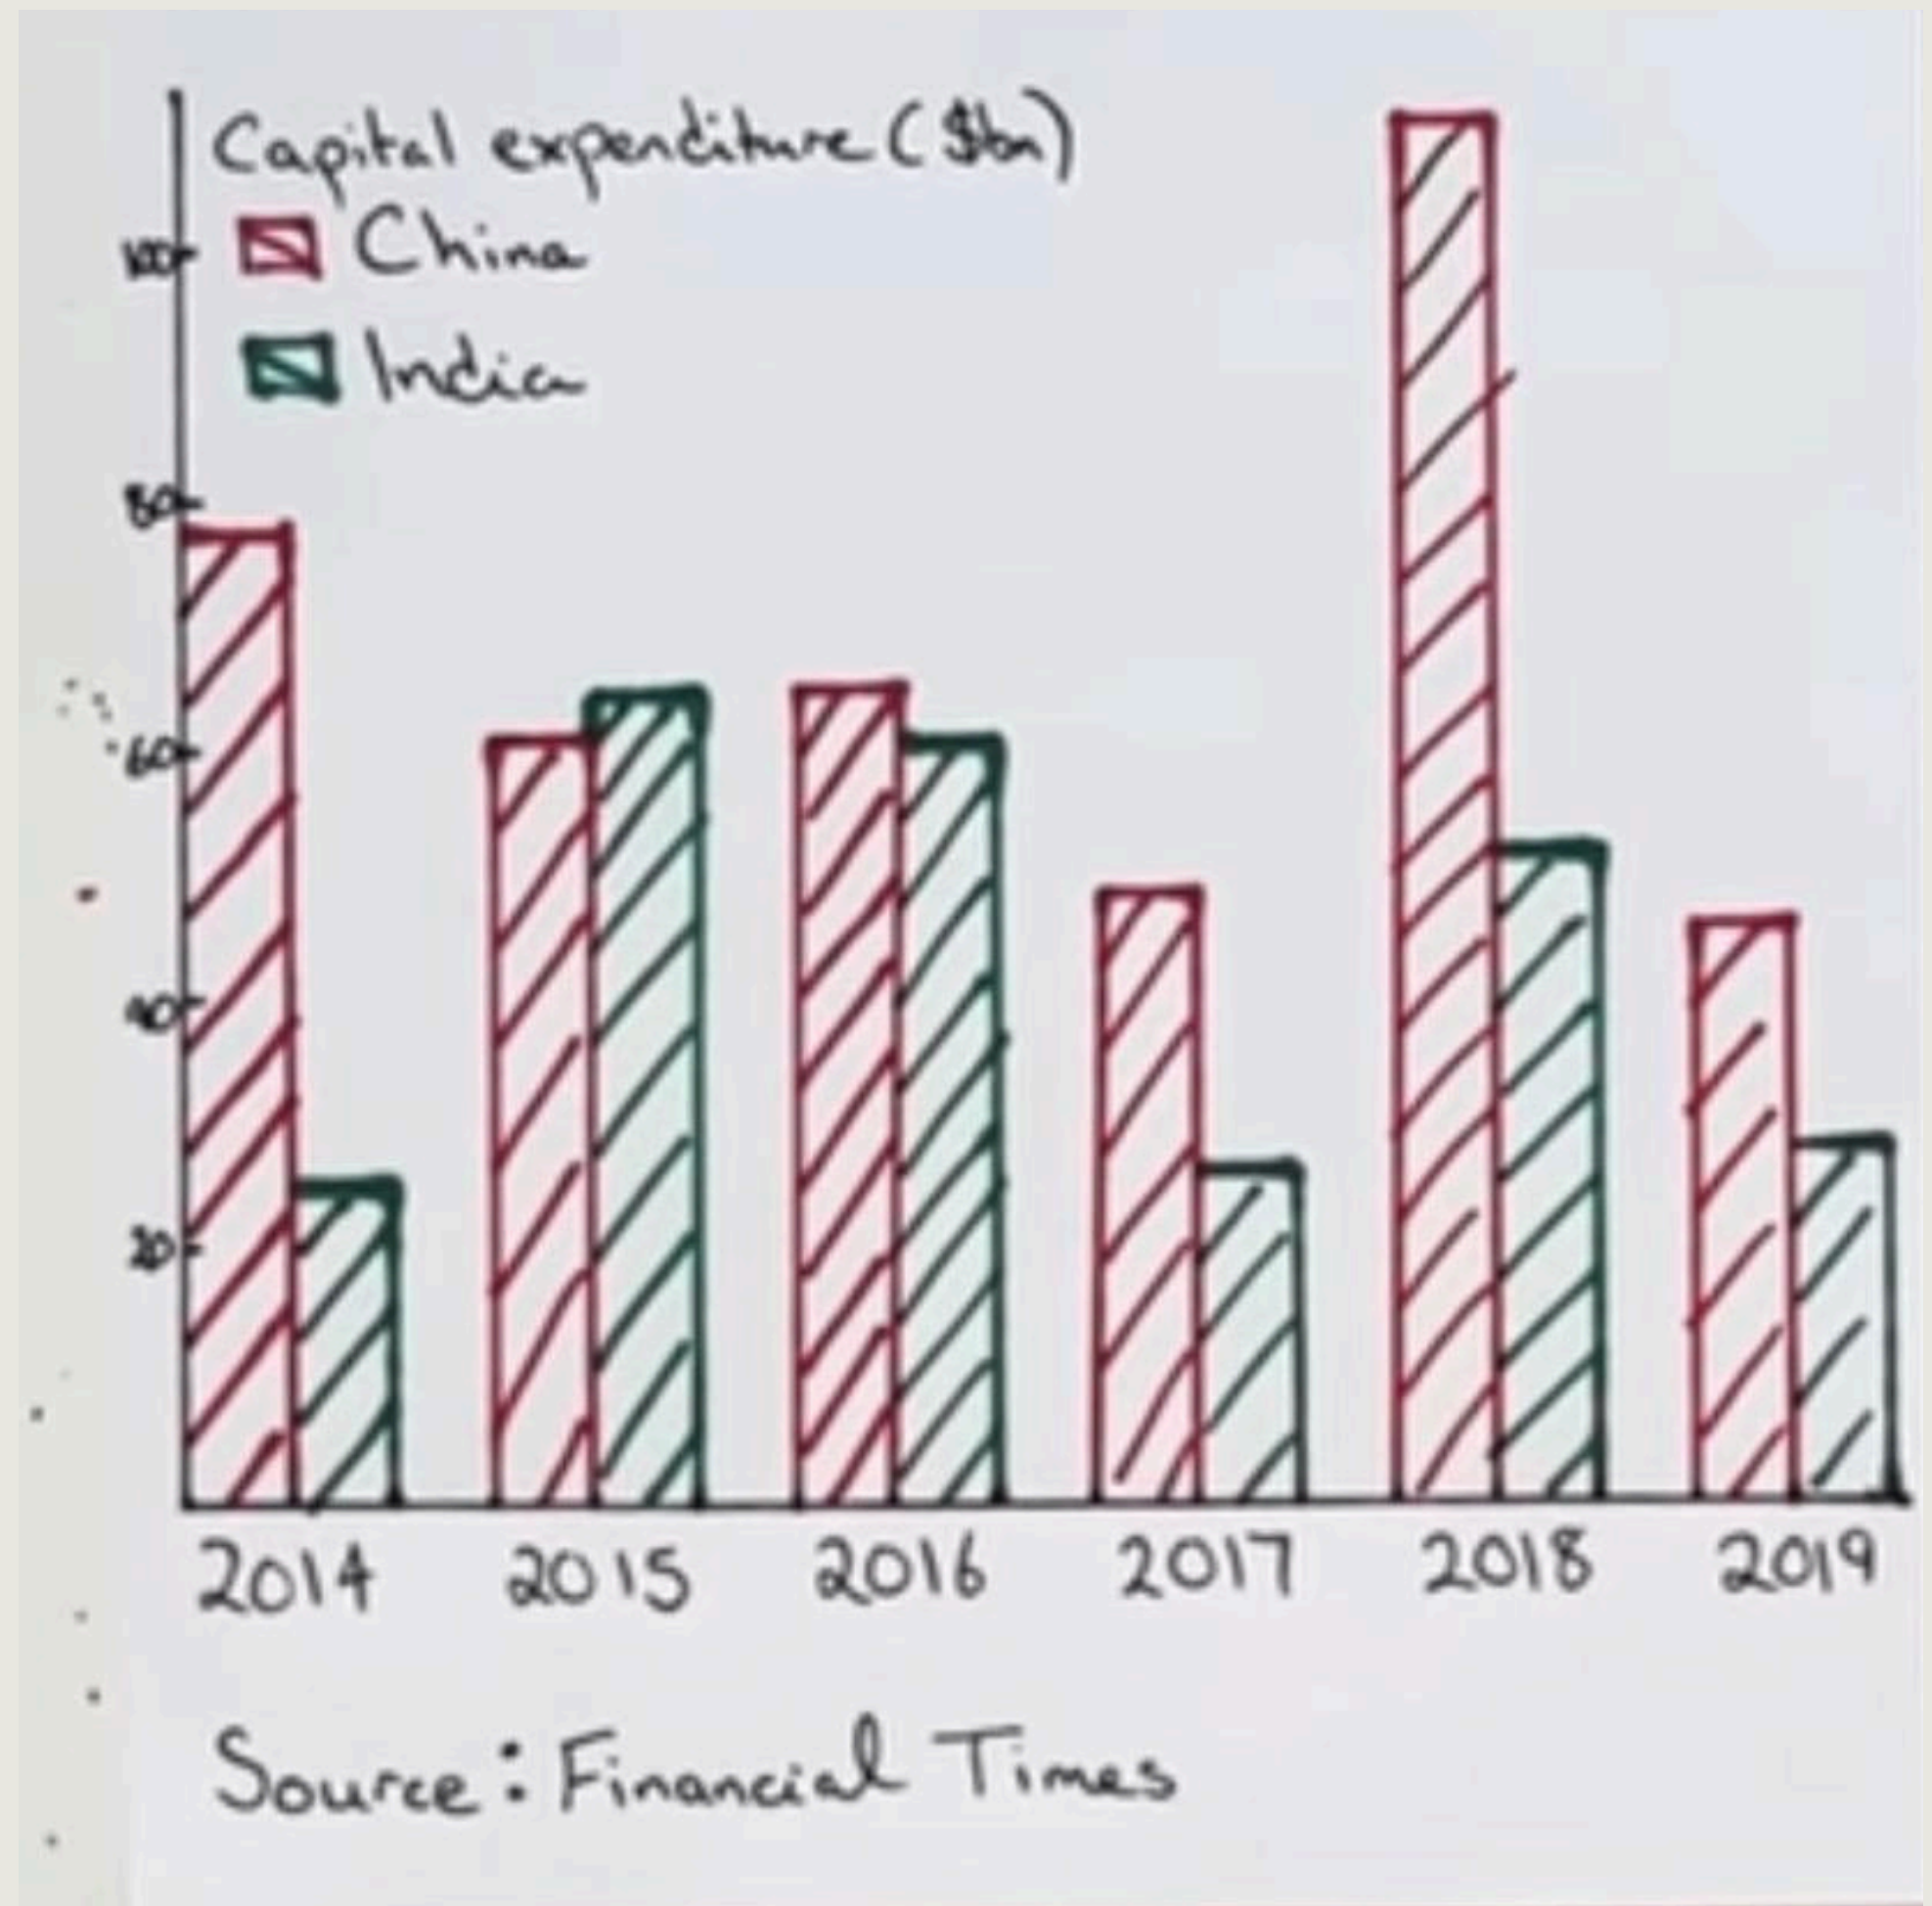

Feature 1 & 2

- **Group data for feature 1 and 2**
- **Can group by country/similar trend etc etc.**
- **Describe rate at beginning, at end and any interesting/important point**
- **Support your details with data**
- **Write in 1 tense**

Example

The bar chart shows the amount of foreign direct investment in India and China from 2014 to 2019.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

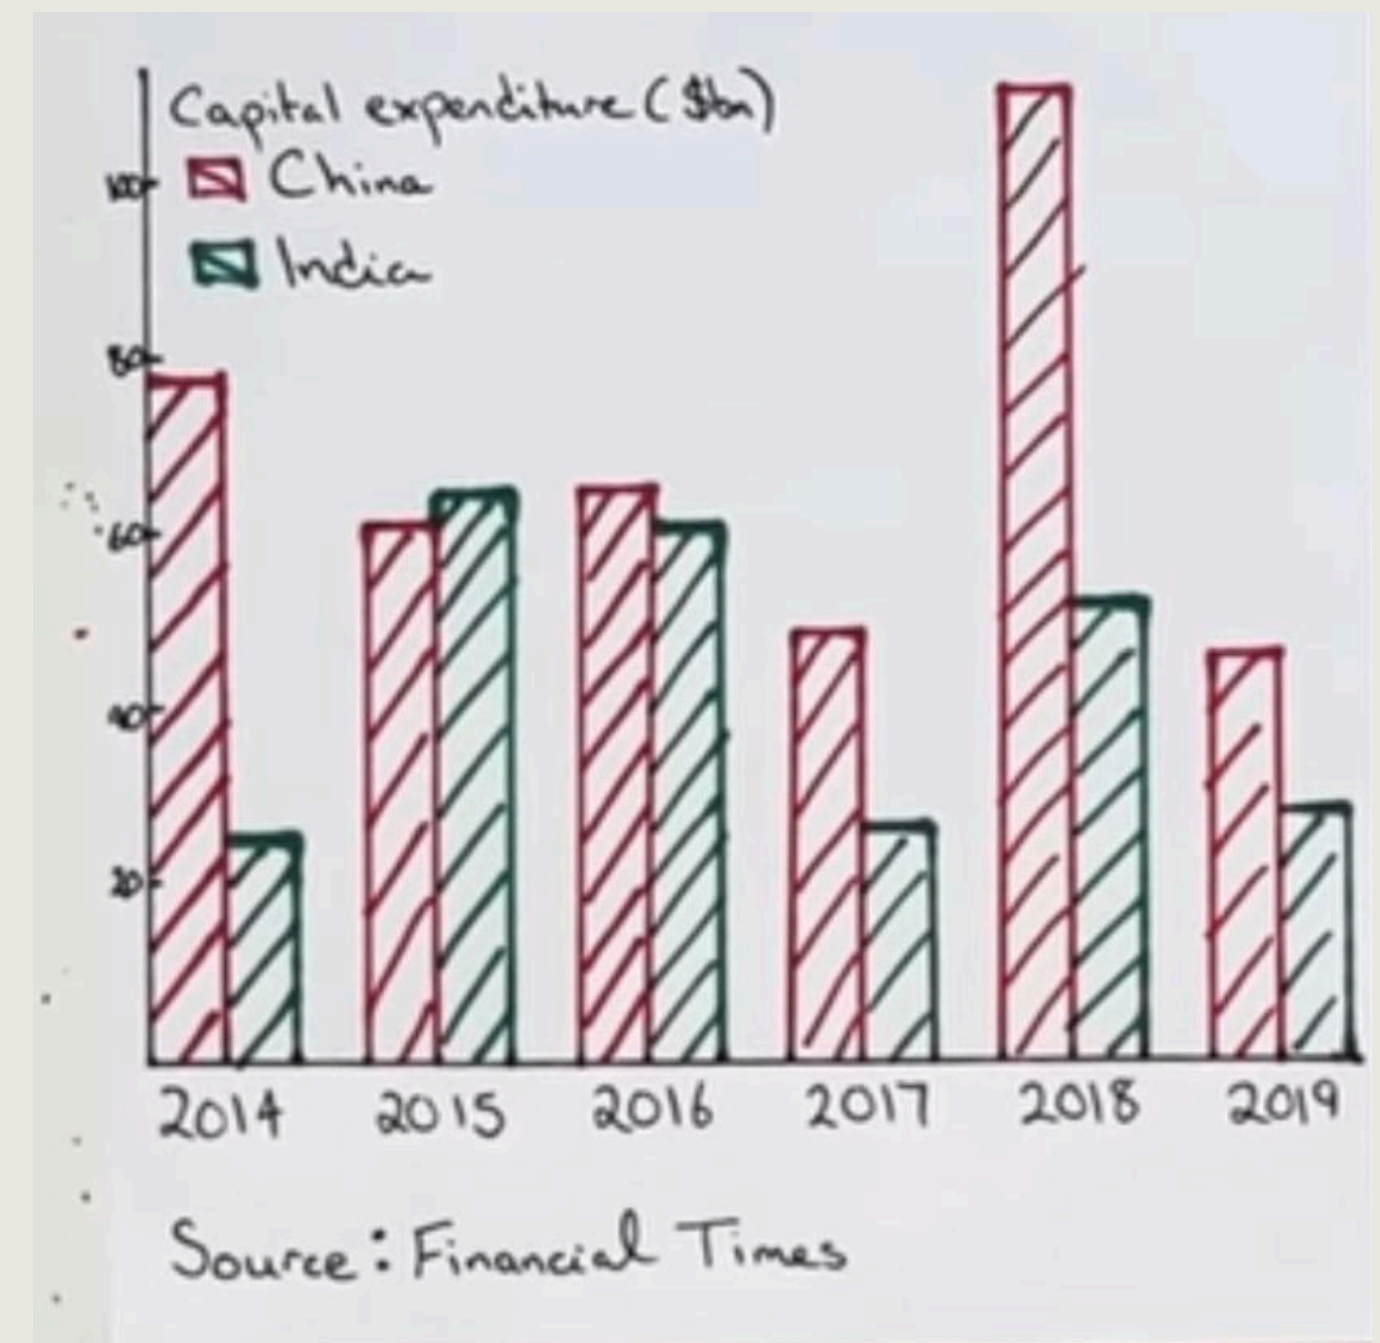

Answer:

The chart illustrates the level of outside investment in the economies of India and China between 2014 and 2019.

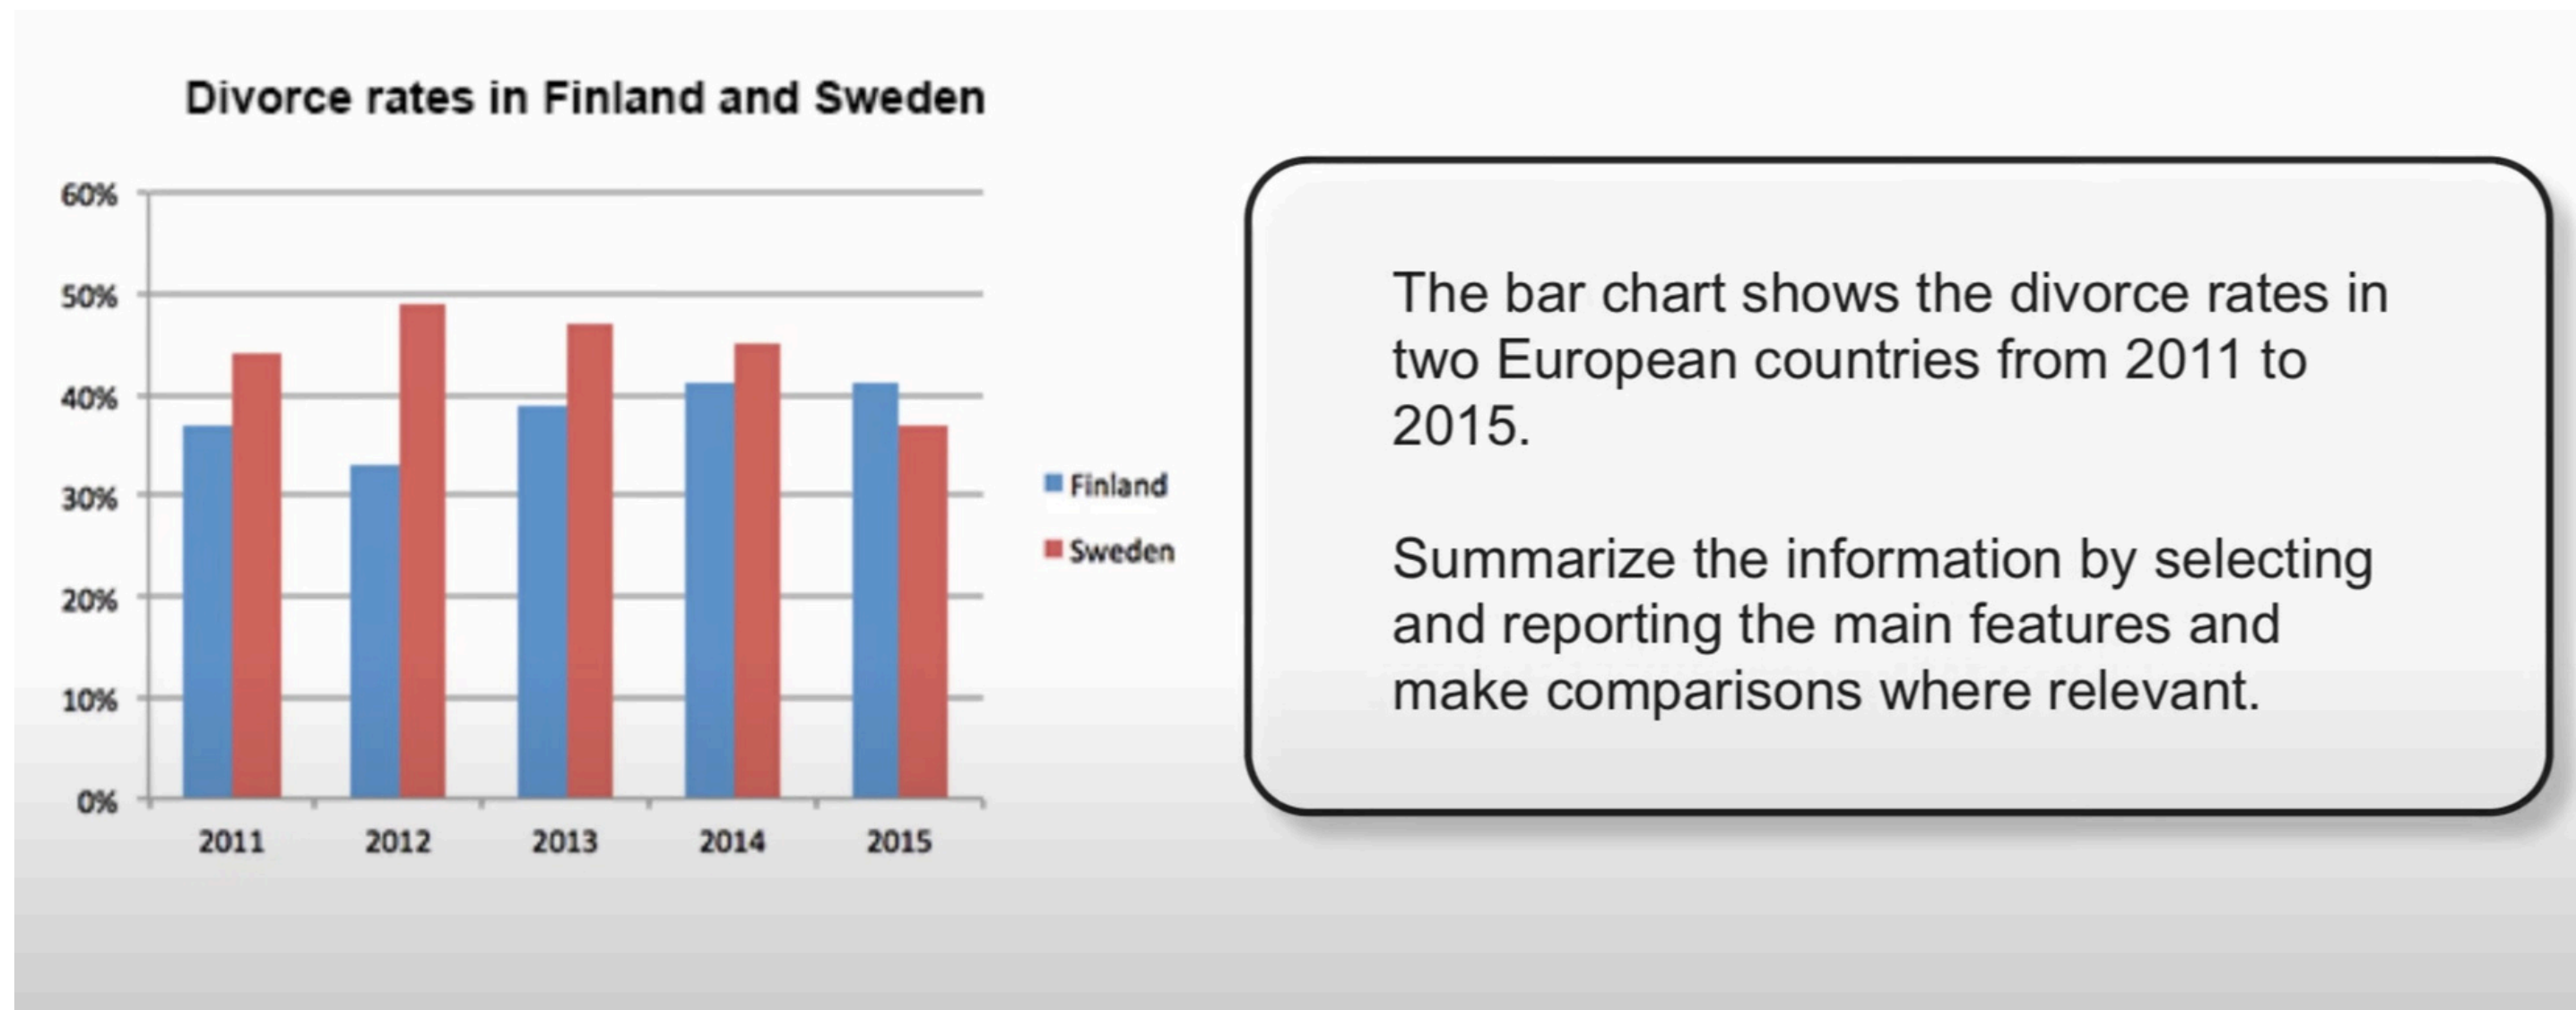

Overall, expenditure in China declined steadily throughout the period but fluctuated in India. Despite this, the total amount of money that flowed into China was higher than in India.

The Chinese economy received just under \$80 billion in 2014, which fell to around \$60 billion in 2015 and 2016. After a slight decrease in 2017, there was a massive resurgence to a high point of more than \$100 billion in 2018 before receding to just over \$40 billion in 2019.

In 2014, foreign outlays into India's economy reached more than \$20 billion then rose significantly to approximately \$60 billion in 2015 and 2016 before falling back to 2014 levels in 2017. In 2018, there was another dramatic increase to just below \$60 billion, before returning to around \$20 billion in 2019. 2015 was the only year India's levels of foreign investment exceeded China's, with values of slightly over \$60bn and slightly below \$60bn, respectively.

Example 2

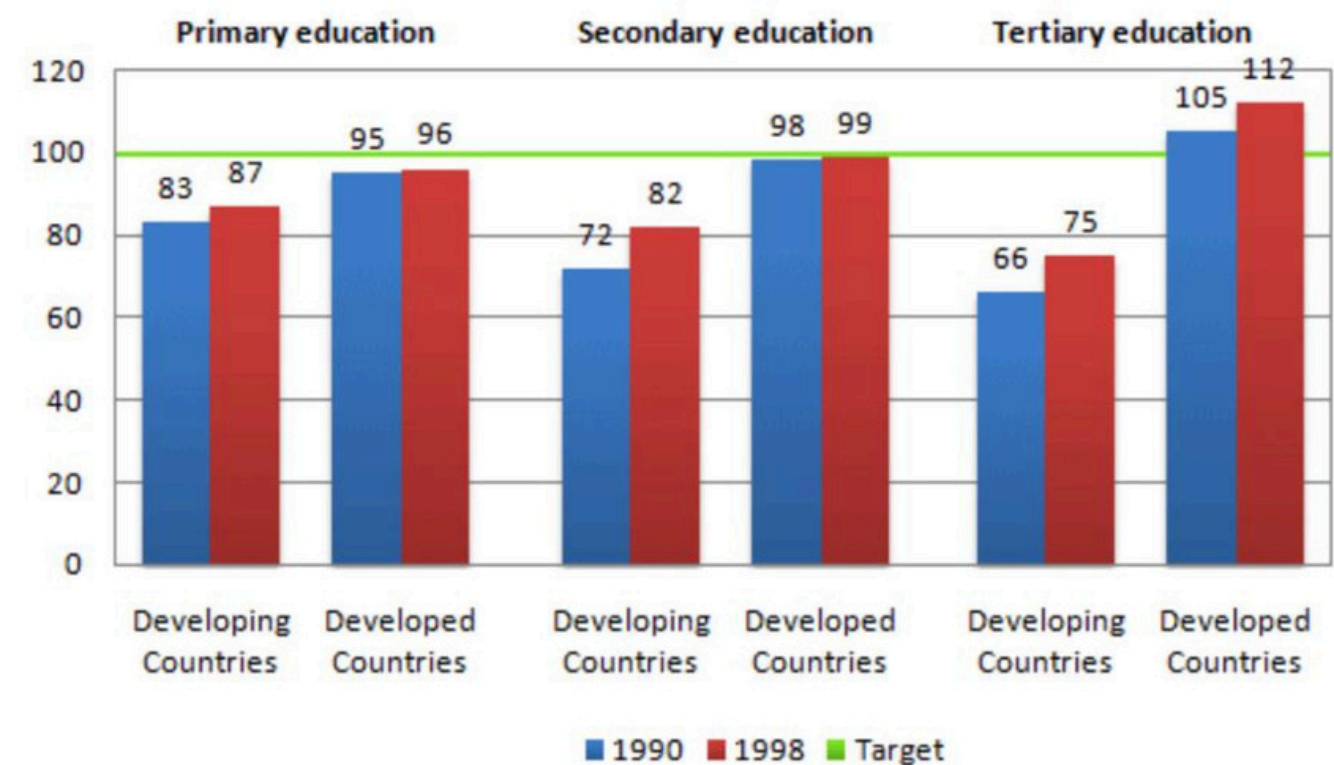

Example 3

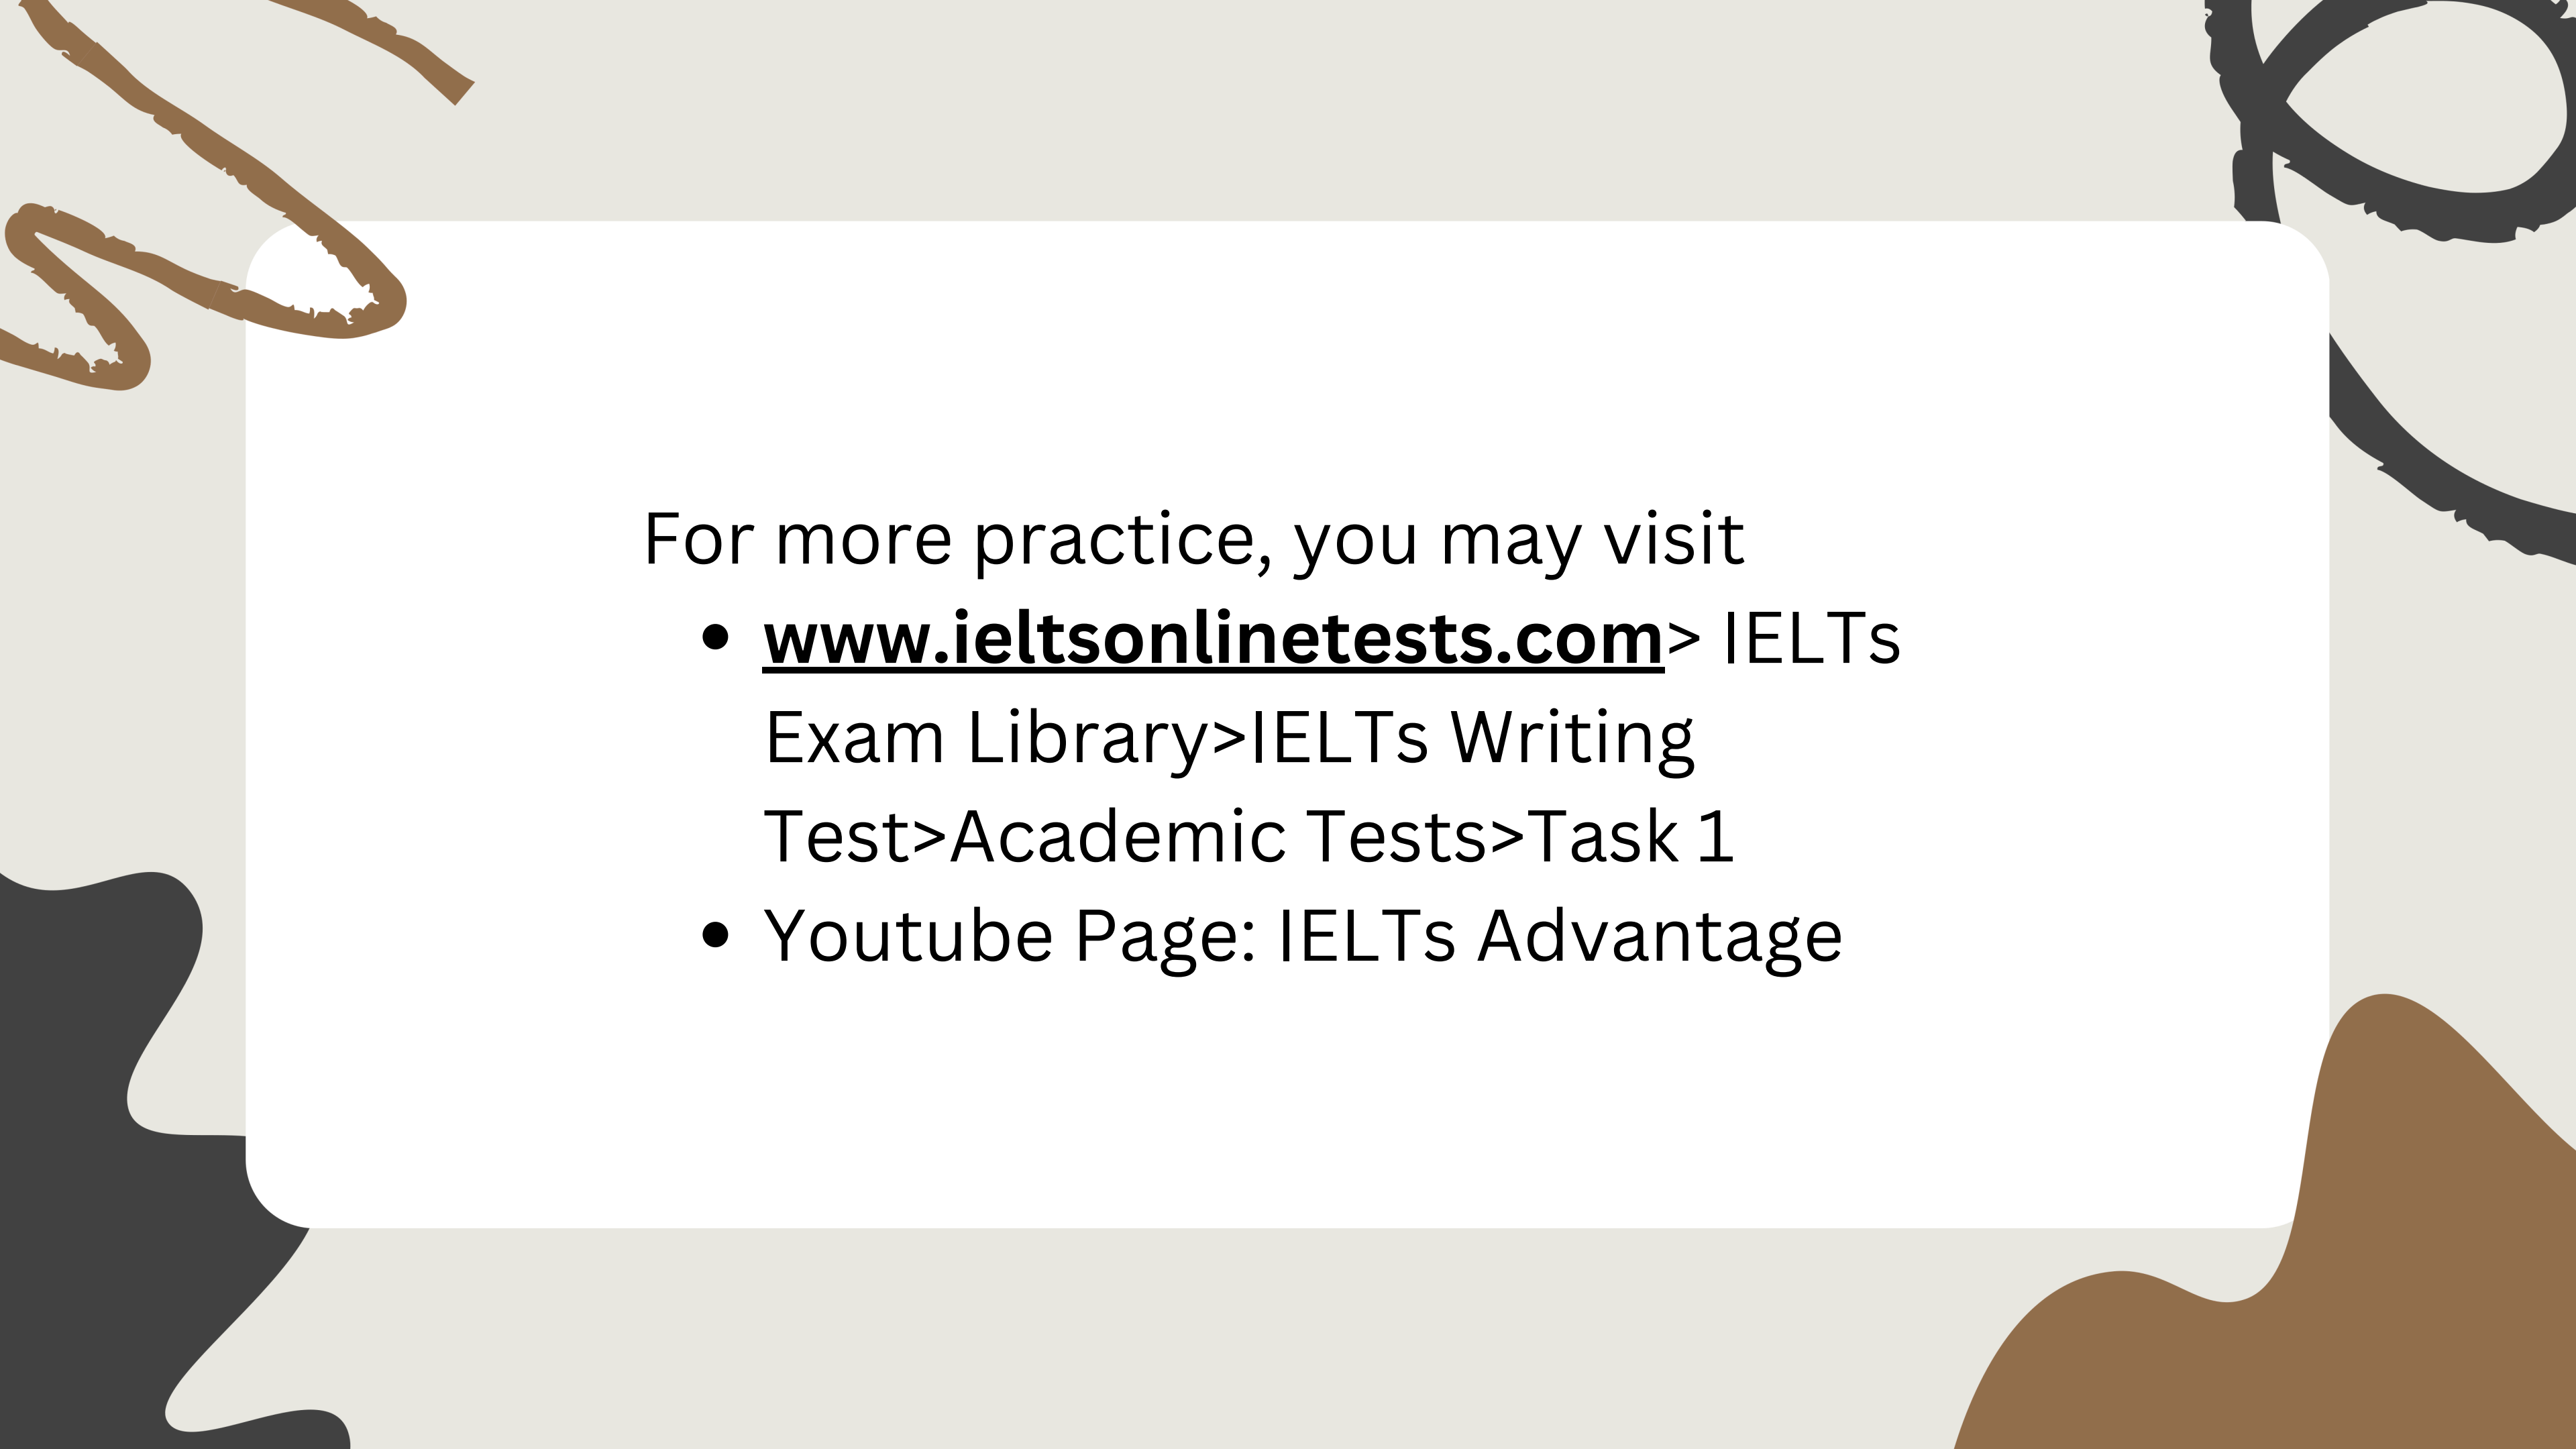

The chart below shows the number of girls per 100 boys enrolled in different levels of school education.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

You should write **at least 150 words**.
